Frozen semen collected, processed, stored and shipped by Hawkeye Breeders Service, Inc. or its affiliates is handled according to tried and recognized industry standards. HBS, its affiliates, its employees and/or agents will not be held liable for injury or disease to persons, or animals through the handling or use of semen or materials or containers used in this shipment. HBS and its affiliates do not guarantee the fertility of frozen semen. No guarantee or warranties of merchandise of any kind can be inferred. Semen produced by this lab is approved by HBS for only "Single AI Use" which means using a straw of semen in a single use, single animal AI application to impregnate a naturally ovulating or estrus synchronized female of the same species. "Single AI Use" excludes all other reproductive methods, such as any manner of producing Embryos for transfer into recipients, whether by super ovulating a female and flushing the Embryos once fertilized (referred to as embryo flush and transfer or "ET"), or using the sperm in the straw to fertilize oocytes with intracytoplasmic sperm injection ("ICSI") or other in vitro fertilization ("IVF") techniques. HBS WILL NOT BE RESPONSIBLE FOR ANY LOSS OR LACK OF SUCCESS FOR ANY REASON IF SEMEN IS USED IN THIS MANNER. The shipping or semen is at the risk of the recipient party. HBS and its affiliates does not accept any liability for any semen/embryos lost or damaged by the freight carrier or transport container failure after the shipment leaves our facility. In the unlikely event that any of our products shall be proven defective or mislabeled, damages resulting from their use shall be limited to production costs.
